

NATURAL SANITIZER CLEANSER

Product description

Cleanser for manicures and pedicures, with **5 functions**:

- cleanses
- sanitizes
- refreshes
- deodorises
- moisturises

Natural Sanitizer Cleanser sanitizes and cleanses hands and feet thoroughly while respecting skin's hydrolipid balance. It removes impurities and sweat effectively and creates an invigorating and refreshing sensation, leaving skin feeling pleasantly clean and fragrant and soft to the touch.

Guidelines for use

Spray directly onto feet and hands and massage until fully absorbed.

Do not rinse. External use, do not use on damaged skin. Avoid contact with eyes.

In case of contact, rinse thoroughly with water. In the event of adverse reactions, stop use and immediately consult a doctor. Inflammable.

Keep away from sources of ignition. Keep out of the reach of children.

Dermatological studies have demonstrated the safety and high skin tolerability of Natural Sanitizer Cleanser

SUITABLE FOR DIABETIC FOOT SKIN

Product characteristics

**5in1 hydro-alcohol-based** sanitising cleanser containing a synergistic complex of medicinal plant extracts with antibacterial, antifungal and antiviral properties.

Containing Alcohol, essential oils of Tea Tree, Thyme, Mint and plant-based cleansers that gently cleanse, moisturising and nourishing the skin.

Contains balsamic essential oils extracted from medicinal plants known for their antiseptic and purifying properties against viruses, germs, bacteria and fungi.

Mint essential oil also gives a pleasant sensation of freshness, deodorises and ensures a delicate fragrance with relaxing and purifying properties.

Its **texture is light** and quickly absorbed and thanks to its practical spray dispenser it can be dispensed very easily. It does not foam up and does not require rinsing.

Natural Sanitizer Cleanser consists of **99% natural ingredients** and does not contain artificial fragrances. Its **pleasant** scent exclusively derives from plant extracts.

**TARGET:**  
All skin types.

**TARGET:**  
All skin types.

**The medicinal herbs****Alcohol**

Obtained from agricultural raw materials, it has disinfecting properties. When it comes in contact with bacteria and viruses, it changes and alters the chemical structure of their proteins and their enzymes, neutralising them using an effective antiseptic action.

**Melaleuca Alternifolia (Essential Tea Tree oil)**

It has an effective antibacterial, antifungal and antiviral effect. It is an exceptional natural antifungal and an excellent healer.

**Thyme (essential oil)**

It is an excellent natural disinfectant, antibiotic and anti-inflammatory. It eliminates germs, bacteria and fungi from the skin effectively.

**Peppermint (essential oil)**

It has an effective local anaesthetic effect on the skin, due to the double action of vasoconstriction and vasodilation immediately following its application. It also has strong refreshing, tonic and purifying properties.

**Cleansers of natural origin**

Very delicate plant-based cleansers comprising skin-friendly lipids, with restoring properties (degreasing), able to cleanse and at the same time moisturise and nourish the skin.

**Menthol**

It has a significant soothing, refreshing and toning effect on muscles, encourages venous circulation and provides freshness to tired and swollen legs. It is a powerful antibacterial.
